

To my valued subscribers.  
From Gabriel Aguinaga.

Hi there,

Gabriel Aguinaga here.

You know, a lot of people ask me (including family members) “Gabriel, how EXACTLY did you manage to become successful online so darn quick?”

Quick? Are you kidding.

I’ve been breathing Internet marketing for almost 3 years now and it feels like I’ve been at it for at least 10 years.

- I’ve spent **SO MANY** hours studying this game.
- I’ve gone through **SO MANY** obstacles.
- I’ve felt like quitting **SO MANY** times.

Yet to outsiders it looks like I began making money online overnight.

Recently, I’ve had 3 family members come to me and ask...

“I want to do what you do Gabriel, how do I get started?”

Gosh, where to start?!

You see...

Building a 6-figure online business takes A LOT of hard work and dedication.

Building a 6-figure online business is NOT easy. (It’s actually pretty darn difficult)

So what do I tell my family members when they ask me about Internet marketing?

I tell them that the best way to get started is to start as an affiliate marketer.

I tell them to learn basic html (website code) and I advice them to get their hands on a good html editor (ie: DreamWeaver, FrontPage, or the Free [NVU](#))

I also tell them that learning copywriting is absolutely a MUST.

\*My definition of copywriting: writing to get a most wanted response from someone. Used to get people to BUY from you and Opt-in to your list.

Which brings me to my next point...

**YOU HAVE TO build a list of subscribers.**

So let me ask you...

Have you started building your list (aka: started your own internet newsletter)?

If your answer is yes, then congratulations!

If not, why in the world haven't you started?

Haven't you noticed that all gurus have one thing in common?

Yah, they all have a huge asset, a cash cow if you will... it's called an opt-in list!

Here's the thing...

Today I am not writing to teach you how to make money online, but rather to share an important message with you, to tell you WHY I believe I'm successful (and maybe, just maybe *(and hopefully)* it will help you).

Obviously, it is not very common for a 24 year old to make more money than most doctors...

There has to be a reason...

And here it is...

I KNEW I was going to be here one day.

I KNOW that I will become a millionaire before the age of 30.

That has really been the key.

I have NEVER doubted myself.

I have NEVER let anyone tell me that "it can't be done".

(if it has been done before, then there's no freaking reason why I cannot do it, period.)

## A QUICK STORY...

My family came to the United States when I was just 10 years old and we were literally homeless.

My mother did housekeeping for a middle-class family and her “pay” was having a roof over her children’s head.

She endured a lot of insults and was humiliated constantly but she put up with it because she loved us (her four children)

She is a great mother and my true hero.

## Here Comes The “Why”...

I am not really into the ‘motivational stuff’ but I honestly believe that I’m successful because I’ve always known WHY I wanted to be successful.

It wasn’t just because I wanted money (Yes, I wanted a lot of money)... BUT...

Deep down inside I wanted to make my family proud.

I wanted my mother to be able to brag about the accomplishments of her son.

To me, that was an EXTREMELY powerful reason “WHY” I was going to become successful.

The sentence... “What if I don’t make it?”... NEVER crossed my mind.

And YOU should NEVER let it creep up into your head either.

You should ALWAYS say...

“When I make it”

You should KNOW that your success is just a matter of time.

That your success is a matter of “WHEN” - not “IF”

So... what is the reason **WHY** you want to become successful in business?

What is driving you?

Figure that out and you’ll get what you want out of life much faster. 😊

## Keep This In Mind, Because...

No one is going to build a successful business for you.

No \$47 e-book or \$997 course contains the “secret” to instant online riches.

Good old hard work, dedication, and laser-sharp focus will do the trick.

Yes, investing in tools and information that will help your business grow is good; but if you are not using those tools and information... you are just throwing money down the drain. (make sure you actually apply what you learn, and use the tools you purchase)

### **WHY AM I SAYING THIS? (no I'm not selling anything)...**

Well, because Mike Filsaime just launched a new course and it is being pushed like crazy.

I've seen so many emails screaming...

#### **“YOU NEED THIS COURSE”**

Need?

How can ANY marketer know what YOU need?

Only you know what you need... so don't go off buying stuff just because someone says you need it (especially when the price is high).

It's one thing to recommend something and another to try to shove it down someone's throat.

## Closing The Rant...

Well, as you can probably tell... this is a quite disorganized rant. LOL

I'm just writing what's on my head right now and thought you would find it interesting.

In following newsletters I'll be sharing with you how I am building my online business and how I plan to build my million dollar empire (cuz trust me, IT IS going to happen ☺)

I'm looking forward to having you on my list for a LONG time and I sincerely hope that what you learn from my experience helps you build a thriving online business.

To Our Success & Happiness,  
Gabriel Aguinaga
